

Why Lequick Design?

Choosing the right designer isn't the easiest task. However, knowing a few things about Lequick Design may help you with your search.

Experienced. I have experience with clients as large as Microsoft and airlines, and as small as individual artists. I created my first website in 1995 while you were probably listening to Hootie and the Blowfish and Boyz II Men.

Focused. I never have more than 2-3 projects at the same time. This means you get focused attention.

Confidential. All material and knowledge is treated with confidentiality and security. LQD can and does work with NDAs.

Mobile. If necessary, I can work on-site with you or your team. Copenhagen only.

Agile. LQD adapts to each project, and can help you find the extra talent your project may need.

Innovative. A love of new and shiny things is an asset, even if that new and shiny thing is something the audience may never see. Like web standards. I work to keep up-to-date with the latest in the quickly evolving world of web standards and trends.

Accessible. LQD is fully present, and will keep you informed of project status and checkpoints.

Attentive. I'm good listener who knows the design process and manages projects proactively.

Direct. I tend to call it as I see it, and I have a general aversion to bullshit. I appreciate the same in my clients and find that this shared trait builds a strong and lasting working relationship.

Guiding. Design is a process. Along the way, I can help you understand why a particular design direction is better or worse than an alternative.

Scandimerican. I believe that a blend of Scandinavian functionalism and minimalism with an American melting-pot playfulness results in something original and good. This something is naturally called Scandimerican. Who else offers that?
